

## Copy-Paste Email Template

Copy and send this email to any street light supplier. Replace the fields in brackets: [Name], [Model].

### Email Subject

**Request LM-79 Report and IES File for Roadway Evaluation**

### Email Body

Hi [Name],

Please share the following for the street light model [Model]:

- 1) LM-79 photometric test report (full report)
- 2) IES photometric file (LM-63 format)
- 3) Optical distribution type (Type II / Type III / Type IV or project-specific)
- 4) Drive current and thermal assumptions (ambient temperature, housing temperature limits)
- 5) Warranty terms and spare/maintenance strategy

We will use these to validate road performance (uniformity, glare control, and long-term stability).

Thanks,  
[Your Name]

Tip: If the supplier shares only chip efficacy or marketing charts, reply requesting LM-79 + the matching LM-63 IES file for the exact quoted configuration.
